

CXS chemical dry vacuum pump

CXS - An introduction

Chemical processes present special challenges when it comes to vacuum. Equipment often has to operate in damp, dusty, corrosive, flammable or explosive environments.

Whatever your process requirements, Edwards can provide an innovative and economic solution that is safe, flexible and reliable.

Building on long experience of vacuum applications, the new CXS range provides all the advantages of dry pumps while setting new standards for reliability, performance, control and economy.

CXS chemical dry pumps are ideally suited to even the harshest chemical and pharmaceutical processes and provide optimum performance in a wide range of applications, including distillation, drying, evaporation, reactor service, house vacuum, solvent recovery, sterilisation, fatty acid deodorisation and filtration.

CXS benefits

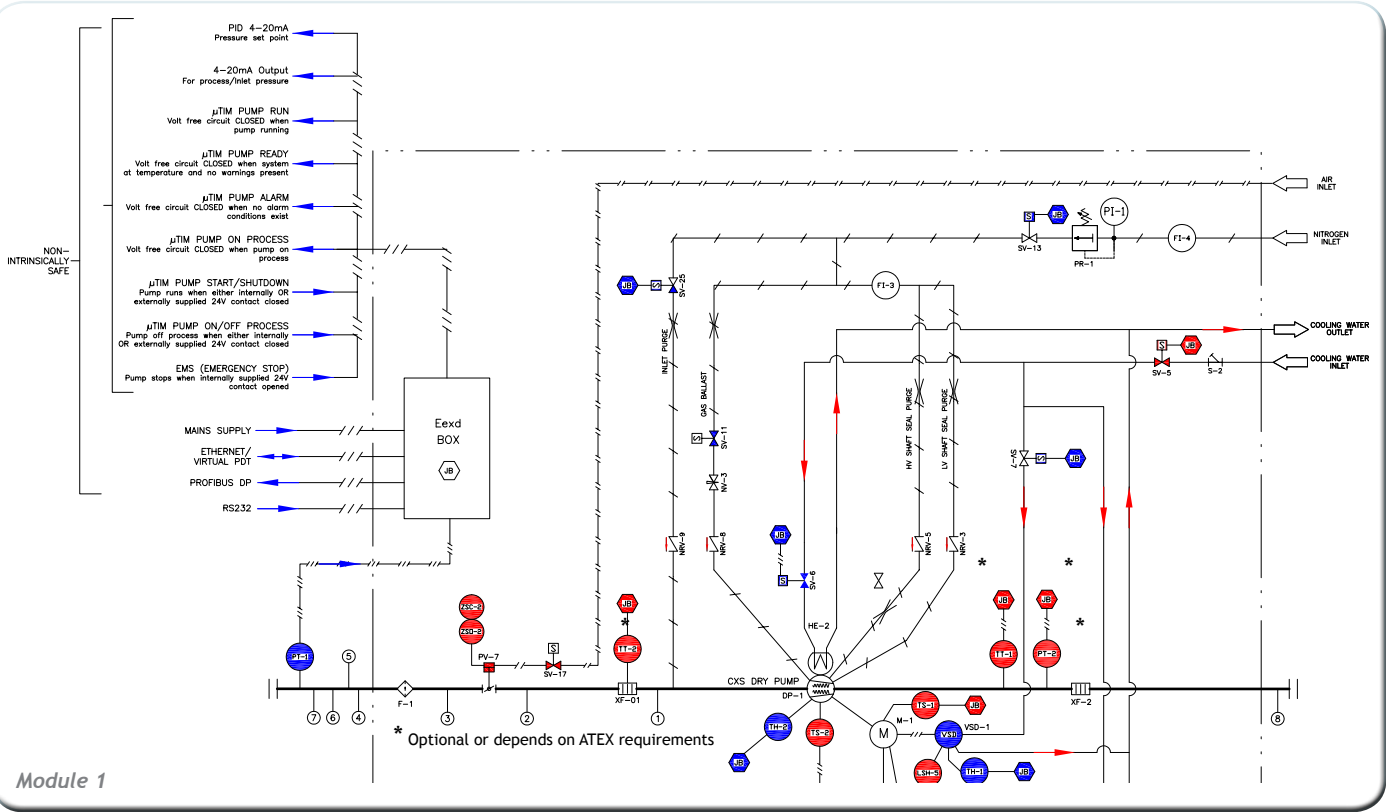

- Low cost of ownership
 - With low energy usage and utility costs
 - No routine service and major service intervals of up to five years
- Simply reliable
 - Even in harsh environments
 - Excellent liquid and solids handling
- Environmentally friendly,
 - No contamination of the process stream or cooling water,
 - No effluent generation
- Safety assured
 - ATEX certified for use in hazardous environments.
 - Pumps corrosive vapours without corroding
 - Explosion-proof to ensure safe pumping of flammable gases
- Flexible
 - Can be combined with booster pumps to provide deep and flexible vacuum down to 10^{-3} mbar
- Outstanding support from a global company
 - Famed for its best-in-class technology and applications expertise

Module 3

Module 4

Module 5

Module 6

Module 7

CXS Module options:

- Module 1: CXS Pump with Purges, Inlet and Outlet Flame Arresters, Inlet Valve, Inverter, Controller & Safety Interlocks
- Module 2: Solvent Flush Package
- Module 3: Inlet Valve By-pass Line
- Module 4: Inlet KOP with Level Control
- Module 5: Inlet Receiver with Auto-drain
- Module 6: EH Mechanical Booster
- Module 7: Exhaust Condenser & Receiver

Additional Module Options:

- Exhaust Silencer
- Dust filter
- Pressure Control Valve
- Other Control Options
- Additional Mechanical Boosters
- Documentation Packages
- System Skid

	EXTERNAL CONTROLLER
	MAIN ONBOARD SAFETY CIRCUIT
	SAFETY CIRCUIT, EXTERNAL CONTROLLER
	PUMP CONTROLLER

CXS features

- CXS chemical dry pumps feature cutting-edge tapered screw technology. Smooth, gradual compression along the length of the rotor results in improved thermal control and optimised performance at all inlet pressures.
- An advanced temperature management system maintains the pump temperature at programmable levels for optimal, repeatable process performance.
- The innovative design uses high efficiency air-gap potted motors.
- Integral drive and control systems further help to lower the cost of ownership.
- The pump mechanisms are smooth and quiet running, with noise levels as low as 64 dB(A).
- They can pump up to one litre of liquid per minute continuously and slugs of up to 25 litres without stopping. CXS chemical dry pumps are designed to be good at handling solids and easy to restart.
- An integral controller, PID pressure control and safety systems allow for 'plug and pump' operation. Pumps can be linked to any external control system via a variety of interfaces including Ethernet and Profibus DP.
- CXS chemical dry pumps have a long service interval of up to five years and require minimal maintenance over their life expectancy of more than 25 years.

Systemisation

CXS chemical dry pumps are available as stand-alone pumps or complete systems, including mechanical boosters for higher pumping capacities, and can be enhanced with a range of standard accessories such as valves, flame arresters, condensers, knock-out pots and filters.

Two models are available initially, the CXS160 and CXS250, which give nominal capacities of 160 m³h⁻¹ and 250 m³h⁻¹ respectively.
